

SASI™ Group Exercise

Handout

Assessment of Integration by Objective

Directions:

1. For each objective, record how far along you believe the network is in achieving that goal systemwide. Record your answer as a percentage, e.g., 50% achieved for networks that are about halfway toward fully achieving the objective.
2. Choose the top three objectives that, in your opinion, are most important for the network to work on in the next phase of your development of an integrated system.

Degree (%) to which this objective is met across the network	Objective Statement	Choose the 3 most important
_____	1. Clients are involved in their own care and are strongly supported in self-care management.	_____
_____	2. The needs of populations are identified; high-risk groups are targeted, though not to the exclusion of other groups.	_____
_____	3. A full array of effective and efficient services is provided.	_____
_____	4. Seamless care is provided across settings and over time.	_____
_____	5. Care management is focused on disability prevention and organized around defined populations (e.g., high-risk, condition-specific).	_____
_____	6. Information sharing systems allow providers in all settings to share meaningful information about clients, costs, and operations.	_____
_____	7. Financing systems promote systemwide management of cumulative costs, tied to care outcomes.	_____
_____	8. Management strategies and structures support cross-site, interdisciplinary efforts.	_____
_____	9. Network governance supports and improves the ability of individual care providers to work together as a single system to improve outcomes and continuity of care delivery to people with chronic care needs across settings.	_____
